

Modernizing Collaboration for Field Teams

Rebuilding intranet and product evaluation apps on SharePoint Online for Construction Material Supplier.

Our client sought a modern solution to facilitate internal collaboration and manage new product evaluations. Krish Services Group designed a SharePoint Online intranet and custom PowerApps-based evaluation platform tailored to their business needs.

CLIENT BACKGROUND

The client is a regional distributor specializing in construction supplies. Efficient internal communication and rapid product evaluation processes were critical to maintaining a competitive edge.

BUSINESS VALUE

- **Improved operational transparency** and information accessibility.
- **Streamlined product evaluation** lifecycle from consideration to performance tracking.
- Positioned them for **future scalability** and collaboration enhancement.

PROBLEMS

- **Aging SharePoint Environment:** Legacy intranet on SharePoint 2003 was no longer scalable.
- **Fragmented Product Evaluation Processes:** No structured system for tracking new product consideration and feedback.
- **Information Silos:** Departments operated independently, slowing down collaboration and decision-making.

SOLUTIONS

- **Intranet Migration:** Migrated legacy intranet to SharePoint Online with optimized information architecture.
- **Custom Evaluation App:** Built a PowerApps solution to manage new product submissions, feedback, and sales tracking.
- **Hub Site Structuring:** Configured hub sites to enhance department collaboration and reporting.

TECHNOLOGIES

CONCLUSION

Krish Services Group's modernization efforts empowered construction material supplier to enhance internal collaboration, accelerate product adoption decisions, and lay a solid foundation for ongoing digital growth.
