

## Strengthening SharePoint Governance and Access

Implementing site provisioning frameworks and governance consulting for Power Corporation.

A global power company required governance consulting and site provisioning frameworks for their SharePoint environments to support compliance needs and streamline site creation processes. Krish Services Group delivered a structured consulting engagement to meet these needs.

### CLIENT BACKGROUND

Our client is a global power management company delivering energy-efficient solutions for customers worldwide. Managing internal collaboration systems like SharePoint was crucial to secure and compliant operations.

### BUSINESS VALUE

- **Improved regulatory compliance** and internal governance.
- **Accelerated** SharePoint **provisioning** and usage across teams.
- **Strengthened** SharePoint solution **security** and sustainability.

### PROBLEMS

- **Unstructured Site Provisioning:** Inconsistent SharePoint site creation practices led to governance risks.
- **Compliance Challenges:** Tenant environments needed evaluation against ITAR and regulatory requirements.
- **Inefficient SharePoint Development Practices:** Lack of standardization in application development slowed productivity.

### SOLUTIONS

- **Governance Consulting:** Conducted tenant evaluations and recommended standardized governance practices.
- **Site Provisioning Framework:** Implemented frameworks for controlled, rule-based site creation across departments.
- **Development Best Practices:** Provided consulting to improve SharePoint solution development and compliance.

### TECHNOLOGIES

### CONCLUSION

Krish Services Group's consulting engagement helped global power management company align SharePoint operations with industry regulations, increase internal efficiencies, and support global digital collaboration initiatives.
