CASE STUDY Construction supply | SHAREPOINT ONLINE | POWER APPS

Modern intranet and evaluation app for faster product decisions.

Phipps, a US construction supplies distributor, ran on an ageing SharePoint 2003 intranet. Krish built **a new intranet on SharePoint Online** and a **custom product evaluation app** on Office 365, so teams decide faster on new products.

CLIENT: PHIPPS, A REGIONAL CONSTRUCTION SUPPLIES DISTRIBUTOR IN THE US

FROM	TO	BUILT
2003	**Online**	**Custom app**
Legacy SharePoint 2003 intranet content migrated	A new SharePoint Online intranet with a hub site structure	A Power Apps app for suggesting and evaluating new products

CLIENT BACKGROUND

Phipps is a **regional distributor of construction supplies in the US**. Its contractors and field teams need fast information, clear communication and timely product evaluations.

Efficient internal communication and rapid product evaluation were critical to its competitive edge. Its SharePoint 2003 intranet had reached its limits.

BEFORE
SharePoint 2003 intranet
Unstructured product evaluation and information silos

→

AFTER
SharePoint Online intranet
Hub sites plus a Power Apps evaluation app

THE CHALLENGE

Ageing SharePoint environment
The legacy SharePoint 2003 intranet had clear scalability limits.

Fragmented product evaluation
There was no structured way to submit and review new product ideas.

Information silos
Departments and regions worked apart, which slowed communication and decisions.

Limited mobile access
The old intranet had limited mobile access and poor usability.

WHAT WE DELIVERED

01 **Legacy data migration**
Content moved from the SharePoint 2003 intranet to SharePoint Online.
SHAREGATE

02 **Intranet design**
A new intranet designed and built on Office 365.
SHAREPOINT ONLINE

03 **Information architecture and governance**
Information architecture and governance designed, with a hub site structure.
HUB SITES

04 **Product suggestion app**
A custom app for employees to propose new products to stock.
POWER APPS

05 **Office 365 configuration**
Office 365 configured for the intranet and app, with Microsoft Flow.
MICROSOFT FLOW

RESULTS

Faster product decisions
Faster internal decisions on new product introductions.

Centralized information
One place for product information and internal updates.

Scalable intranet
An intranet that supports future business growth.

Better transparency. Information is easier to share across departments and regions.

TECHNOLOGIES USED

SharePoint Online | Power Apps | Microsoft Flow | Sharegate | Office 365 | SharePoint 2003 (source)

FINAL PERSPECTIVE

Krish gave Phipps a **modern, scalable intranet** and a structured way to evaluate new products, so field teams and leaders work from one shared source of product information.
